2015\_11\_03\_GKM\_ICP\_SitrepNo48.pdf

Terry,

Most of this information is included in the most recent SitRep (attached). This is not available to the public so please do not distribute. I would need to search through the history of SitReps to determine how many of the public drinking water systems were tested. I don't recall that we tested the water wells but I will confirm/check anyway. Please call if you have questions. - lw

Laura, Dan, Marty: can one of you access this information or tell Terry where to find it?

Thanks

**Subject:** GKM well water sample counts

Hi all:

HQ has been asked to develop a table of the number of sampling locations and samples taken for the GKM. I can determine the number from the web-site map for sediments and surface water, but we also need the number of samples from private and public drinking water wells. These will be samples not posted to the web-site.

Can you give me a number of wells sampled in your jurisdictions? And if you can break it down to smaller jurisdictions, it would be appreciated. For example, number of wells in New Mexico and number of wells in the Navajo nation jurisdiction? This is all being put together for the Office of Water in looking at potential future funding for long term monitoring.

Deb and David. I am approaching regional EU members for this info., but as the EUs have more or less been dissolved, im not sure who in Region 8 would be able to put together this info. for Region 8. So, I am asking your assistance in this.

Thanks

Terry Smith
